## The EGU Colouring Book – vEGU21 edition...

“For the vEGU21 General Assembly, the EGU Equality, Diversity and Inclusion Working Group wanted to try something new. Working with artist Kelly Stanford, we have created an Open Access collection of line-drawn geoscientist portraits, especially for vEGU21, that can be coloured in by you, your colleagues and of course your family and friends. In fact anybody with a set of coloured pencils or pens can get involved as we represent the diversity of science and scientists that makes up our EGU community!

But it doesn't end here - we will be continuing to collect diverse geoscientist portraits this year and you can expect even more from us in 2022!”

*- Lisa Wingate, co-chair of the EGU Equality Diversity and Inclusion Committee, 29 April, 2021*

“I really wanted to participate in this project so that I could share the diversity within the geosciences and show the more human side to doing research! All the pieces are drawn on an iPad in my spare time while also doing the coloured portraits as part of the EGU Artist's Residency.”

*- Kelly Stanford, digital artist and science communication researcher, 29 April, 2021*

Dr Jenny Turton, polar meteorologist

Prof Chris Jackson, tectono-stratigrapher

Marie Tharp, created the first scientific maps of the ocean floors (1920-2006)

Prof Dan Parsons, sedimentologist

Dr Jane Willenbring, geomorphologist

Prof Hannah Cloke, hydrologist

Greta Thunberg, climate activist

Dr Elisabeth Gallant, volcanologist

Prof Chris Jackson, tectono-stratigrapher

Dr Ira Didenkulova, marine hazards researcher

Dr Chris Skinner, environmental modeller

Dr Minsu Kim, soil scientist

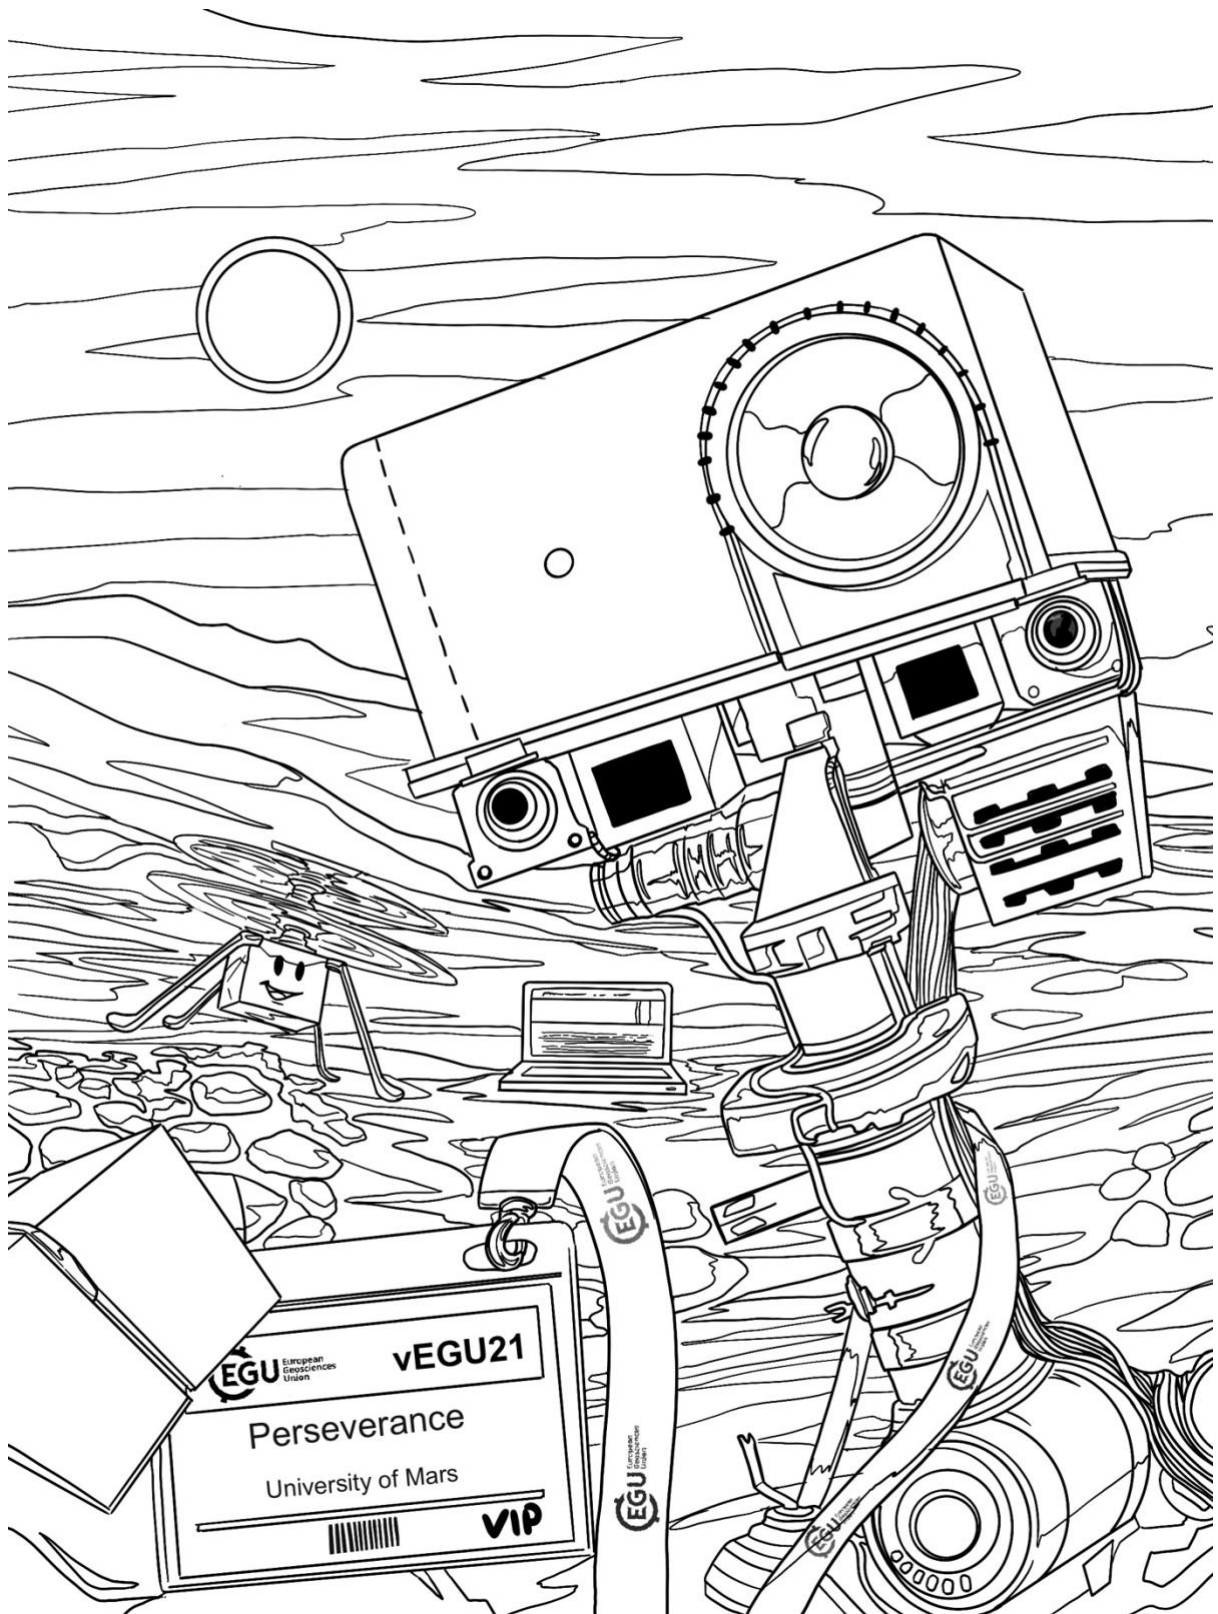

Dr Elisabeth Gallant, volcanologist

Dr Hazel Gibson, science communicator

Perseverance rover, robot and closet geoscientist
